Clinical Privileges
Residents must apply for and be granted clinical privileges by the UIW Eye Institute to be able to participate in the residency program. Residents are required to be supervised as per the Rosenberg School of Optometry Resident Supervision Policy. The Residency Program Supervisor must evaluate and monitor the resident’s level of training, which determines the resident’s privileges.

Performance Evaluations
The residents will receive written evaluations from the Residency Program Supervisor on a quarterly basis. The resident will also evaluate the Program Supervisor and the program biannually.

WORKSITE
The resident will typically work at the UIW Eye Institute three and one-half days per week. The resident will usually spend one-half day per week at one of several external clinics in the San Antonio area operated by the Rosenberg School of Optometry, including the San Antonio Lighthouse for the Blind and the Frank Bryant Community Health Center. The resident shall also have the opportunity to observe surgical procedures at an ambulatory surgical center and laser center.

Clinical Facilities
The UIW Eye Institute is a modern facility that officially opened in 2011. The brand new Eye Institute is a state-of-the-art 60,000 square foot facility that consists of 28 examination rooms, pretest and diagnostic testing rooms, and an optical lab and dispensary. The clinic is staffed by 37 full and part-time optometrists and two part-time ophthalmologists. The Eye Institute is organized into Primary Care, Ocular Disease, Contact Lens, Pediatrics, and Vision Therapy clinics. A laser surgery clinic is also located at the Eye Institute.

Residency in Primary Care Optometry
Rosenberg School of Optometry
Program Mission
The mission of the Residency in Primary Care Optometry at the Rosenberg School of Optometry is to provide advanced clinical training in a context of faith and service for post-graduate optometrists with an emphasis on the management of patients with ocular disease as part of a multidisciplinary team, allowing residents upon completion of the program to pursue professional opportunities which require a high level of clinical expertise.
Residency in Primary Care Optometry

Rosenberg School of Optometry

GENERAL INFORMATION

Program Description
This program provides the resident an opportunity to strengthen their primary care clinical skills and to gain confidence in working with patients presenting with a variety of ocular conditions as part of a multidisciplinary team. The resident will provide optometric care to patients with a diverse range of conditions in the Eye Institute of the Rosenberg School of Optometry, with an emphasis on developing skill and confidence in the management of ocular disease. In this setting the resident will also have the opportunity to broaden their knowledge in clinical testing, diagnosis and therapy by seeing patients in the Primary Care, Ocular Health, Contact Lens, Pediatrics, and Vision Therapy clinics. In addition, the resident shall have the opportunity to rotate through various other Rosenberg School of Optometry-affiliated clinics in the San Antonio area, including the East Side Clinic and the San Antonio Lighthouse for the Blind. The resident shall also have opportunities to participate in clinical research and a variety of didactic and seminar programs on topics related to clinical optometry.

Program Goals
The goals of the program include the following:
- Strengthen the resident’s clinical skills and to gain confidence in working with patients presenting with a variety of ocular disease conditions as part of an interdisciplinary team
- Develop the resident’s knowledge in clinical diagnosis and management.
- Provide the resident with experience in clinical and didactic teaching.
- Engage the resident in scholarly activities

Educational Opportunities
Residents are encouraged to attend continuing education sponsored by the Rosenberg School of Optometry at no charge for credit hours. The resident also have the opportunity to attend CE programs sponsored by the Bexar County Optometric Association and the Texas Optometric Association. The resident is encouraged to attend at least one major national educational meeting during the year.

Research/Scholarly Responsibilities
The resident is required to make one presentation on an optometric topic. This may be a faculty seminar, continuing education lecture, or guest lecture in an optometry course. The resident is also required to write one paper of publishable quality by the end of the residency.

Opportunities to participate in research studies exist for those residents that have an interest in clinical research.

Benefits
The resident receives employment benefits through the University of the Incarnate Word. These include health insurance, professional liability insurance, paid vacation, paid holidays and paid sick leave. Residents receive 2 weeks paid annual leave and 8 hours per month paid sick leave per year. There are also 9 paid holidays annually. In addition, residents receive 5 days of professional leave and a $1000 travel stipend to assist with attending a national optometric conference.

Certificate of Completion
A certificate of completion will be awarded to the resident upon satisfactory completion of residency requirements. The completion requirements of the program are:
- Completed publishable quality paper (research paper, literature review, case report)
- Deliver one presentation on an optometric topic
- Submission of all residency evaluation forms (activity logs, exit evaluations)
- The resident is qualified to see patients independently under the Rosenberg School of Optometry Resident Supervision policy
- Successful completion of NBEO Part 1, Part 2, and Part 3

RESIDENCY EXPERIENCE

Lecturing and Teaching
Residents will make at least one presentation on an optometric topic prior to the completion of the residency program. Lecturing opportunities include faculty seminars, continuing education programs, and guest lecturing in courses taught at the Rosenberg School of Optometry. The resident will also participate in the education of optometry students in the clinical procedures laboratory and the primary care clinic of the School.
